-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's Prior Art (APA hereinafter, Figures 1A-1b) Kang et al (US 6424401).

APA discloses all claimed limitations except for a sealant contacting the first covering layer via the opening.

Kang discloses a conventional liquid crystal display device comprising a lower plate and an upper plate bonded to each other by the seal. Kang discloses that such device yields problems such as a weak adhesive between the sealant and the organic protective film, a crack is generated when an exterior impact is applied there to cause a leakage of liquid crystal. Kang solves such problems by forming the sealant contacting the organic protective film via the opening (see at least Figures 6a-6b). Therefore, it would have been obvious to one of ordinary skill in the art to employ the sealant contacting the organic protective film via the opening for avoiding problems such as a weak adhesive between the sealant and the organic protective film, a crack is generated when an exterior impact is applied there to cause a leakage of liquid crystal.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
